Colours

n /tuˈkaˈnata/ [word comprising the noun *Tucano* (*Urbano* implied) + the suffix *ata*, coined in Milan at the end of the '90s when the city was invaded by swarms of motorcyclists wearing personalised helmets with donkey, mouse, cat and other animal ears]

1. Product or characteristic of a product which solves the problems and meets the needs of scooter and motorbike riders in an innovative, creative, unexpected and, why not, ironic way.
2. (ext.) Innovative unexpected gesture or creative gimmick whose originality expressed in an ironic, irreverent and, at times, visionary way, is a constant surprise.

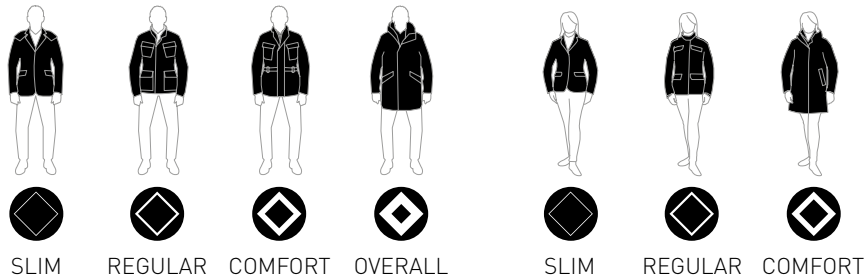

4 FITTING SIZES

1. SLIM: follows the lines of the body.

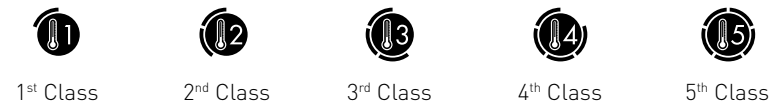

2. REGULAR: normal, neither slim nor loose.

3. COMFORT: comfortably loose, also for jackets that are padded or have several layers or removable linings.

4. OVERALL: very loose, typically for clothing such as rainwear that goes on top of multiple layers.

INSULATION

INDICATIVE THERMAL RESISTANCE

The class is determined by these factors: type of outer fabric, fitting, weight and quality of the padding.

NOTE

Please note that due to printing reasons the orange colour may not be accurate.

ABOUT US

Milan - the late '90s. Tired of struggling with the cold while getting around town on a scooter, we thought why not fix it? And so the **Termoscud**® leg cover was born. First just a few universal models and then increasingly specific designs for each scooter. Starting in Milan and then spreading to other big cities, to become 'the Tucano' or 'the Leg Cover' of choice: the one and only original leg cover for scooters, featuring the patented antiflap **S.G.A.S.** system.

Year by year, the Termoscud® has been joined by waterproofs, clothing, gloves, bags and a wide range of accessories addressing functionality, comfort and safety whilst always retaining that all-important Italian style. Designed to meet the needs of the urban traveller getting around at work and play. From home to work, from work to an evening out, for shopping, up to summer holidays or the trip dreamt for a lifetime: always protected in any weather and always ready for any event.

TERMOSCUD PRO

LEG COVER AND HAND GRIP COVERS

Scooters are nippy in the city, fast, light, clean and trustworthy: that's the way it has to be in winter too. We can't be ruled by the weather and there's no time to waste putting on heavy gear, so the natural choice for the winter season is Termoscud®: the original leg cover.

TERMOSCUD® PRO

R176PRO

Scan the QR to find out all the details.

Can be fitted without a mechanic or specialist.

Cleaning instructions: use a damp cloth, rinse and dry the tapes well before storing in a dry place.

X

black

The evolution of the original Termoscud® leg cover, with new 4 SEASON SYSTEM to extend the period of use of the leg cover.

Thanks to the 4 SEASON SYSTEM, the new Termoscud® PRO offers the following advantages:

- During winter it guarantees maximum warmth and prevents flapping at high speed thanks to the patented anti-flap inflatable system (S.G.A.S.) fitted with a new valve.
- During the summer there is no need to remove it from the scooter: just remove the winter part and leave the rigid spoiler fixed to the bodywork, from where an emergency rain cover and practical seat cover can be pulled out when needed.

Category 1 PPE (Personal Protective Equipment) as of standard CE EN 343:2008.

- HYDROSCUD® construction to guarantee waterproofing:
 - Outer cover in resistant and waterproof 1680 Ballistic and Dobby Polyamide
 - Taped seams
- Thick winter quilt that can be removed in summer
- S.G.A.S: patented anti-flap inflatable system, with new valve **fitted with incorporated cap and watertight closure** (p.12)
- **S.G.A.S. adapter included for manual/pump inflation: makes pumping hygienic and prevents air leakage when the valve is being closed**
- Anti-theft ring
- Large storage pocket
- Seat cover stored in the bib, available also in the summer version
- Emergency rain cover for use in summer
- Reflective profile and prints
- **Smart Holder System: designed for waterproof smartphone pouch holder** (sold separately – code 468 – p. 116)

Custom models for specific scooters (for compatibility lists see pages 138-141 and our website www.tucanourbano.com).

Smart Holder System (p. 116)

Thick winter quilt that can be removed in summer

S.G.A.S: patented anti-flap inflatable system

Seat cover stored in the bib, available also in the summer version

TERMOSCUD®

Can be fitted without a mechanic or specialist.

Cleaning instructions: use a damp cloth, rinse and dry the tapes well before storing in a dry place.

SGAS PUMP code PR02

X

black

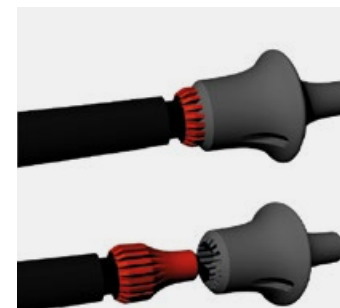

The original leg cover with **PATENTED ANTI-FLAP INFLATABLE SYSTEM (S.G.A.S.)** with a new valve: the inflatable chambers on the sides of the cover prevent flapping at high speed.

Category 1 PPE (Personal Protective Equipment) as of standard CE EN 343:2008

- Three-layer construction to ensure thermal protection and waterproofing:
 - Waterproof heavy Polyamide outer shell and taped seams
 - Fully waterproof inner membrane
 - Faux fur inner
- S.G.A.S. (patented anti-flap inflatable system) with **new valve fitted with incorporated cap and watertight closure**
- **S.G.A.S. adapter included for manual/pump inflation: makes pumping hygienic and prevents air leakage when the valve is being closed**
- Anti-theft ring (only for models not requiring screw fixing)
- Large storage pocket
- Seat cover stored in the bib
- Reflective prints
- **Smart Holder System: designed for waterproof smartphone pouch holder** (sold separately – code 468 – p. 116)

Custom models for specific scooters (for compatibility lists see pages 138-141 and our website www.tucanourbano.com).

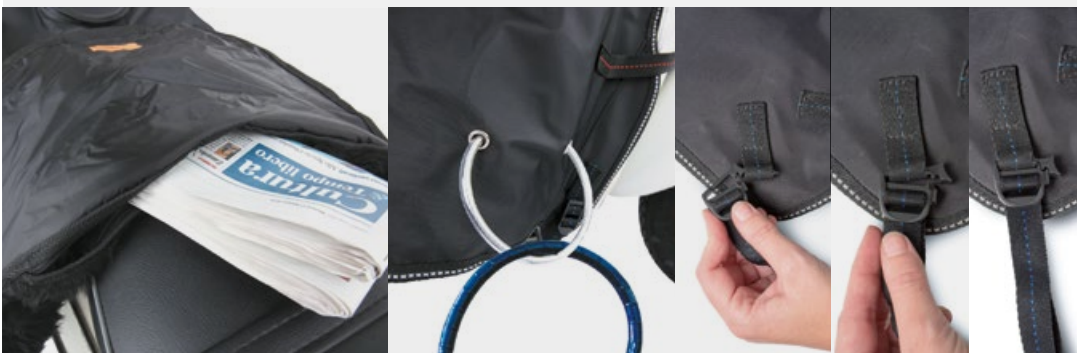

S.G.A.S. adapter included for manual/ pump inflation: makes pumping hygienic and prevents air leakage when the valve is being closed

Built-in saddle cover

Positioning for strap 5

Large glove pocket

Anti-theft system (metal ring) available only on the models without screws

Replacing strap 2 and buckle

Termoscud® folded

Smart Holder System: designed for waterproof smartphone pouch holder (p. 116)

R062WX

PATENTED SYSTEM

THERMAL CONTROL SYSTEM

- In the closed position the deflector directs the warm radiator air to the Termoscud®
- In the open position the deflector prevents the entry of cold air (cold engine) to the Termoscud® • Easy to use • Patented system
- Available only on R049, R079, R154, R156, R161 Termoscud® leg covers

GAUCHO PRO

R1200PRO

NEW
PRODUCT

X

black

The evolution of the original Gaucho leg cover, with new 4 SEASON SYSTEM to extend the period of use of the leg cover.

Thanks to the 4 SEASON SYSTEM, the new Gaucho PRO offers the following advantages:

- For commuting during the winter months, it guarantees full thermal protection and avoids flapping at high speed by means of the patented S.G.A.S. system fitted with a new valve.
- For touring use and, when needed, all year round, it can be easily and quickly removed from the motorbike: just detach the tapes that fix the leg cover to the plate on the fuel tank.

Category 1 PPE (Personal Protective Equipment) as of standard CE EN 343:2008.

- HYDROSCUD® construction to guarantee waterproofing:
 - Outer cover in resistant and waterproof 1680 Ballistic and Dobby Polyamide
 - Taped seams

LINUSCUD

R194

N	ZT	GD	GU	OP
black	tucano leg	woman's leg	man's leg	octopus

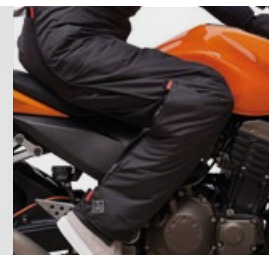

- Leg cover
- Quick and easy to put on using the strap and rear adjustable Neoprene strap
- No fixing points on motorbike/scooter
- Ergonomic design
- Side slits ensure freedom of movement (feet on ground)
- Three-layer construction to ensure thermal protection and waterproofing: - waterproof outer shell in fabric with taped seams - fully waterproof internal membrane - synthetic fur thermal lining inside legs

- Can be secured to the seat when parking
- Built-in bib
- Reflective graphics
- Space-saving backpack style storage sack with mesh insert, built into the bib

At speeds above 50 km/h, the strength of the turbulence jeopardizes the air protection. For frequent use at high speeds, we recommend the use of our Termoscud® equipped with patented anti-flap inflatable system S.G.A.S.

PANTA-FAST

- Easily compactable for ease of storage
- Patent pending

EVA HANDGRIP COVERS

R367X

Inner fixing disc for handgrip covers with Ø28-36 mm diameter

Left handgrip cover which envelopes the controls for greater practicality

FOR HANDGRIP COVERS WITH HAND GUARDS

See list of compatible handlebars on pages 142-146.

1

black

- Hand grip covers for handlebars with hand guards
- **New fitting system on handlebars by means of the bar end weight screw or the included disc; it allows the free return of the throttle**
- Left handgrip cover which envelopes the controls for greater practicality
- Waterproof EVA (Ethyl Vinyl Acetate) outer
- Faux fur thermal lining on contact with the back of the hand
- Rigid opening with elastic windproof adjuster
- Reflective pattern
- Patented model

NEOPRENE HANDGRIP COVERS

R362X

Inner fixing disc for handlebars with Ø28-36 mm diameter

Compatible with handlebars without bar end weights/with handlebars that are not compatible with other models of Neoprene handgrip covers.

Ideal for small scooters.

See list of compatible handlebars on pages 142-146.

1

black

- Hand grip covers for handlebars without bar end weights or which are not compatible with other Neoprene hand grip covers
- **New fitting system on handlebars by means of the included disc; it allows the free return of the throttle; provided strap for fixing on the mirror**
- Neoprene outer covering
- Faux fur thermal padding on contact with the back of the hand
- Rigid opening with elastic windproof adjuster
- Reflective pattern
- Patented model

STREAMLINED NEOPRENE HANDGRIP COVERS

R363X

Inner fixing disc
for handlebars
with Ø28-36 mm
diameter

Compatible with handlebars with bar end weights.

See list of compatible handlebars on pages 142-146.

1

black

- Hand grip covers for handlebars with bar end weights
- **New fitting system on handlebars by means of the bar end weight screw or the included disc; it allows the free return of the throttle**
- Neoprene outer covering
- Faux fur thermal padding on contact with the back of the hand
- Rigid opening with elastic windproof adjuster
- Inner rigid profile for stability at high speeds
- Reflective pattern
- Patented model

NEOPRENE HAND GRIP COVERS

R365

MODEL SPECIFICALLY DESIGNED FOR HONDA DCT TRANSMISSION.

See list of compatible handlebars on pages 142-146.

1

black

- Model specifically designed for Honda DCT transmission
- Universal model for handlebars with bar end weights
- Neoprene with thermal padding
- Rigid opening with synthetic fur trim
- Anti-theft fixing system

POLYAMIDE HAND GRIP COVERS SP

R334

FOR HANDLEBARS WITH MIRRORS

Product suggested for maxi scooters and motorcycles but suitable for most scooters and motorcycles available in the market, with and without bar end weights.

See list of compatible handlebars on pages 142-146.

N

black

- New design
- Heavy Polyamide waterproof outer covering
- Added interior
- Screw tight safety closure
- Transparent window to see displays
- Reflective strips
- Reinforcement on front

POLYAMIDE HAND GRIP COVERS

R333

FOR HANDLEBARS WITHOUT MIRRORS

Product suggested for maxi scooters and motorcycles but suitable for most scooters and motorcycles available in the market, with and without bar end weights.

See list of compatible handlebars on pages 142-146.

N

black

- New design
- Heavy Polyamide waterproof outer covering
- Added interior
- Patented mounting system
- Screw tight safety closure
- Transparent window to see displays
- Reflective strips
- Reinforcement on front

CLOTHING

It doesn't matter whether you're scooting for fun or doing serious riding: you're about

to be hit by something totally new - if you haven't already been contaged: a feeling of pride, of belonging.

With Tucano Urbano's line of bike and scooter clothing you'll find comfort, protection and a great look, plus a whole series of simple but effective technical devices.

OUR SYSTEMS

HYDROSCUD®

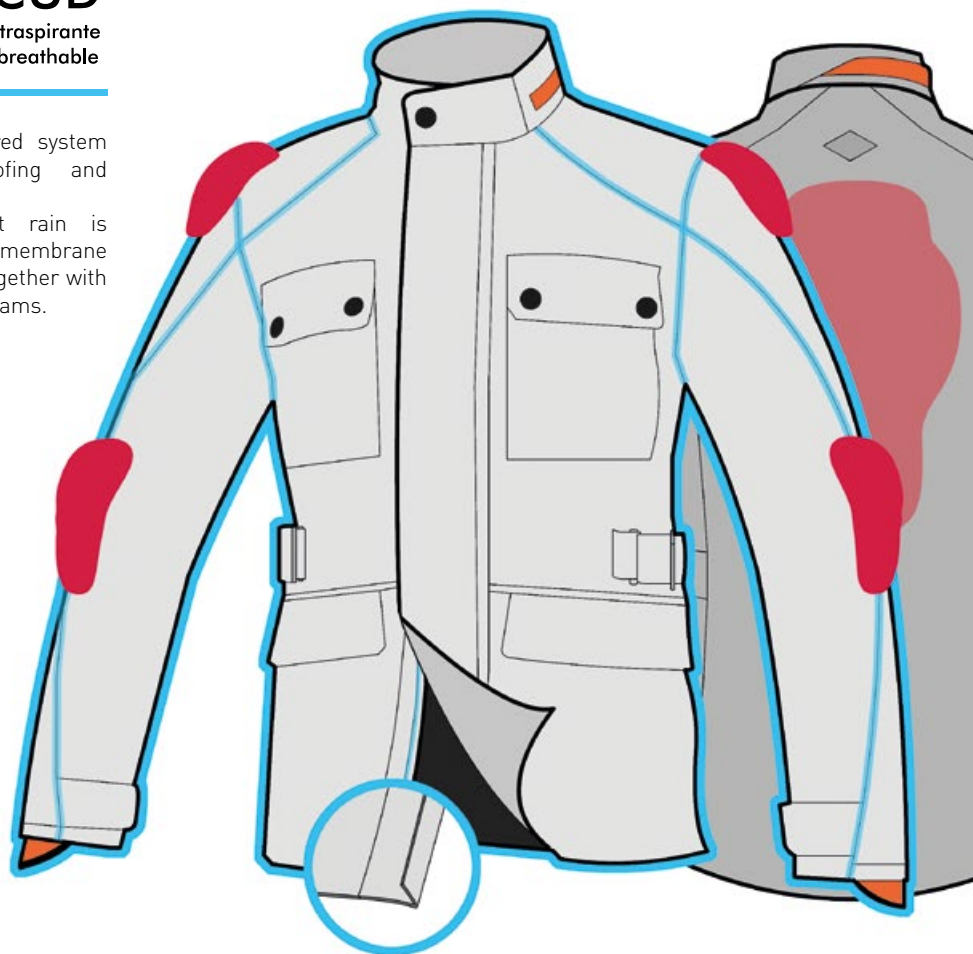

100% impermeabile e traspirante
100% waterproof and breathable

HYDROSCUD® is the registered system that guarantees waterproofing and breathability.

100% waterproofing against rain is guaranteed either by an inner membrane or the use of coated fabrics together with water run-off flap and taped seams.

On the other hand, water repellent fabric causes water to run off, without being absorbed by the fibres. The duration of treatment will vary with the repellent used.

The **COMFORT PROTECTION SYSTEM** is made from the best materials compliant with European standard EN 1621-1:2012, to guarantee safe, light-weight and ergonomic protection.

The technical characteristics of the armours and the study of their correct position in the garment offer an unrivalled level of comfort and fit (see p. 134).

REFLACTIVE® SYSTEM

Visibility on demand

REFLACTIVE® SYSTEM is the registered system for Visibility on demand with retractable reflective inserts.

During your journey the inserts can be kept in view to maximise safety and, on arrival, they can be hidden under the cuff, collar or hood for maximum style.

GLOVES

All the gloves in the Tucano Urbano collection are tested one by one.

Useful information

When choosing your gloves you should think about what you need in terms of heat insulation and sensitivity in your hands: a bulkier glove will offer better protection against the cold while a slimmer glove will offer you greater sensitivity when riding. In the case of leather gloves you should choose a fairly tight-fitting size as the leather will adapt to your hands with use. Finally, always try on different sizes to find the right one for the characteristics you want!

This symbol indicates “**protective gloves for motorcycle riders**” in compliance with the **EN 13594 standard**.

The **EN 13594** standard applies to **protective gloves for motorcycle riders on roads**.

This type of glove **protects the hands and wrists from exposure to weather** and, in the event of accidents, **from impacts** with other vehicles/roadside infrastructure/road surfaces.

Gloves that comply with the EN 13594 standard must pass the following tests:

- **Tear** resistance • **Cut** resistance • Resistance to **abrasion** • **Impact** resistance • Compliance **with specific requirements** for indications of **size, quality** of materials and **ergonomic characteristics**.

The tests are carried out and certified by specialized third party laboratories.

OutDry® uses a one-piece patented construction process that creates a **waterproof breathable barrier**.

This impenetrable layer is heat-bonded directly to the outer fabric, leaving no seams, no gaps, and **no way for water to get in**. Compare that to traditional waterproof technology. Water gets in and stays in, collecting in the space between the inner and outer layers, making them heavy and wet. OutDry improves fit and dexterity, keeping you **drier, lighter and more comfortable**.

NEW RAINWEAR LINE: EVEN MORE RAINPROOF.

The NEW **RAINWEAR** LINE has been designed to meet the needs of **all types of scooter/motorbike riders**: starting with those who ride **only occasionally** to those who prefer **not to be caught out by the bad weather**; from riders with many years of experience to those with a passion for **road adventures**. In addition, our new rainwear line has also been designed to meet the needs of every type of journey: from short and medium trips, right up to long distance journeys.

The new clothing items have been made with the **HYDROSCUD®*** system to ensure that they are **fully rainproof** in accordance with the theoretical requirements of **EN 343:2008****, and that they meet the practical requirements of **EN 14360:2004** which defines test conditions for ready made garments under inclement weather conditions.

The **CE** marking affixed to the **PPE (Personal Protection Equipment***)** attests to the conformity of the product to **EN 343:2008** standard for rainproof clothing. This standard specifies the requirements and test methods applicable to the materials and to the seams normally used in this type of clothing to protect the wearer against the effects of rain, snow, fog and moisture (please read the information notice attached to the item).

In order to establish whether **not only the fabric but also the entire garment** are fully waterproof, the new rainwear line has undergone the **RAIN TOWER TEST**, according to **EN 14360:2004** standard.

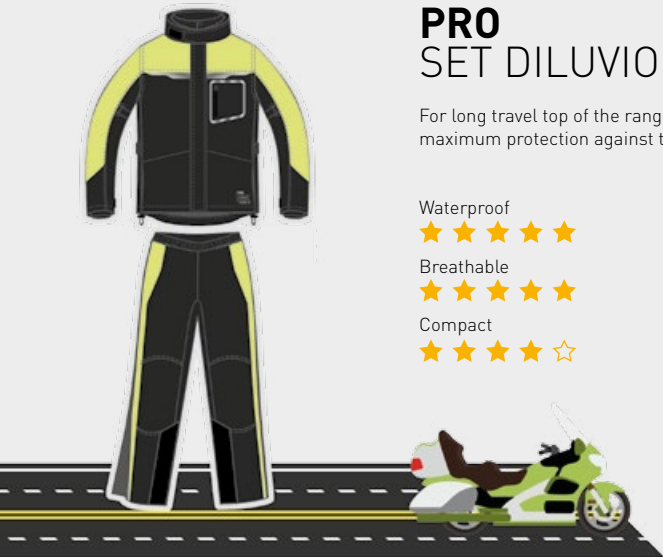

The Tucano Urbano **HYDROSCUD®** registered system guarantees the co-presence of IMPERMEABILITY, BREATHABILITY, TAPED SEAMS AND WATERPROOF CONSTRUCTION.

*Excluding the Set Diluvio Start.

**Valid for Set Diluvio Pro, Set Diluvio Plus, Diluvio Plus Jacket, Pantaloni Diluvio Light Plus.

***Excluding the Nano Rain Jacket Plus, Pantaloni Nano Plus, Set Diluvio Start, Tuta Nano Plus, Set Nano Rain Kid, Nano Rain Zeta, Pantaloni Nano Rain Zeta.

ACCESSORIES

For Tucano Urbano people these aren't accessories... but essentials.

They say you can always tell a real biker by his accessories! So, we have decided not just to look after your smallest needs, but also to let you have fun, breaking free of the humdrum city life and adding a little bit of irony. Just little things that make a big difference!

- 2 filters (CE-EN149:2001 FFP3) included

SAFETY

For us safety means protection, visibility and comfort.

Impact and abrasion protection alone do not guarantee safety on two wheels; it is also essential to be visible, day and night, in the rain and in the fog; maximum comfort is also important to help your concentration and attention on the road.

For these reasons, right from the design stage we pay utmost attention above all to active safety – for example, reflective inserts and high visibility fabrics – and passive safety – that is, certified armour, anti-abrasion fabrics, absence of blunt objects.

Many of our products are certified or type-approved in accordance with EC regulations, an important guarantee of quality and performance. During the certification process we do not aim only for compliance with the minimum requirements of the standard but set our sights higher and use better materials: the fiberglass for the helmets, D30™ and CPS for the armour. Because style and design for us must also and in any case go hand in hand with safety.
